

Photos Storyboard Overview

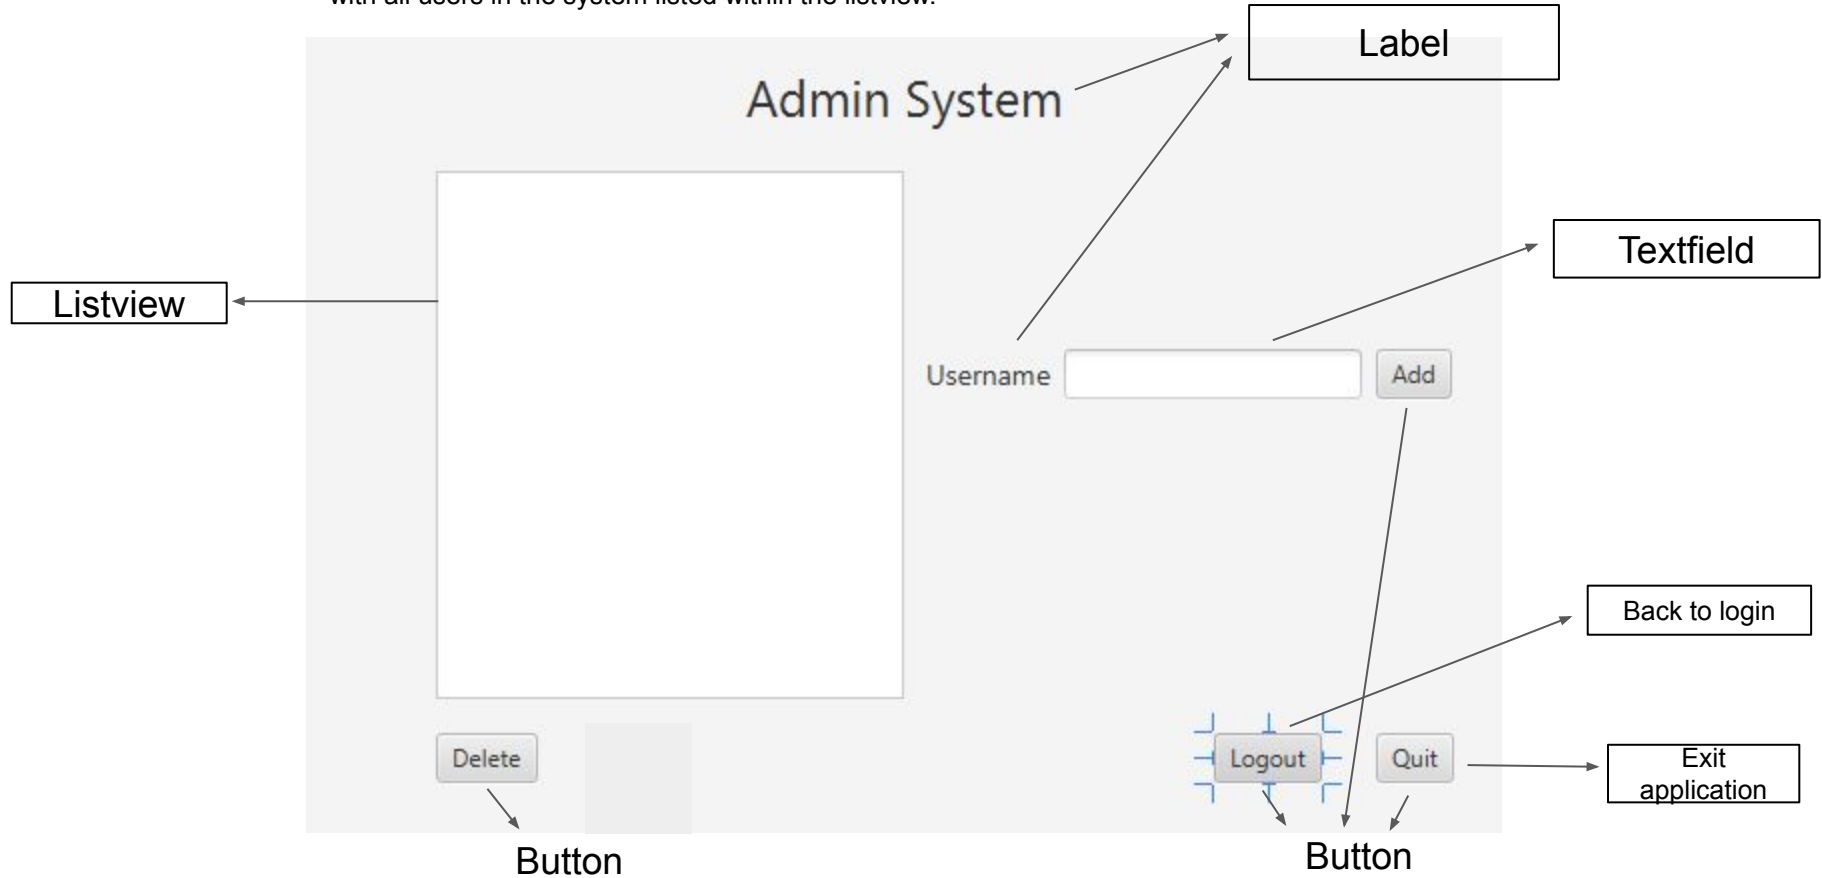

Alden Lu, Sam Lee Group 64

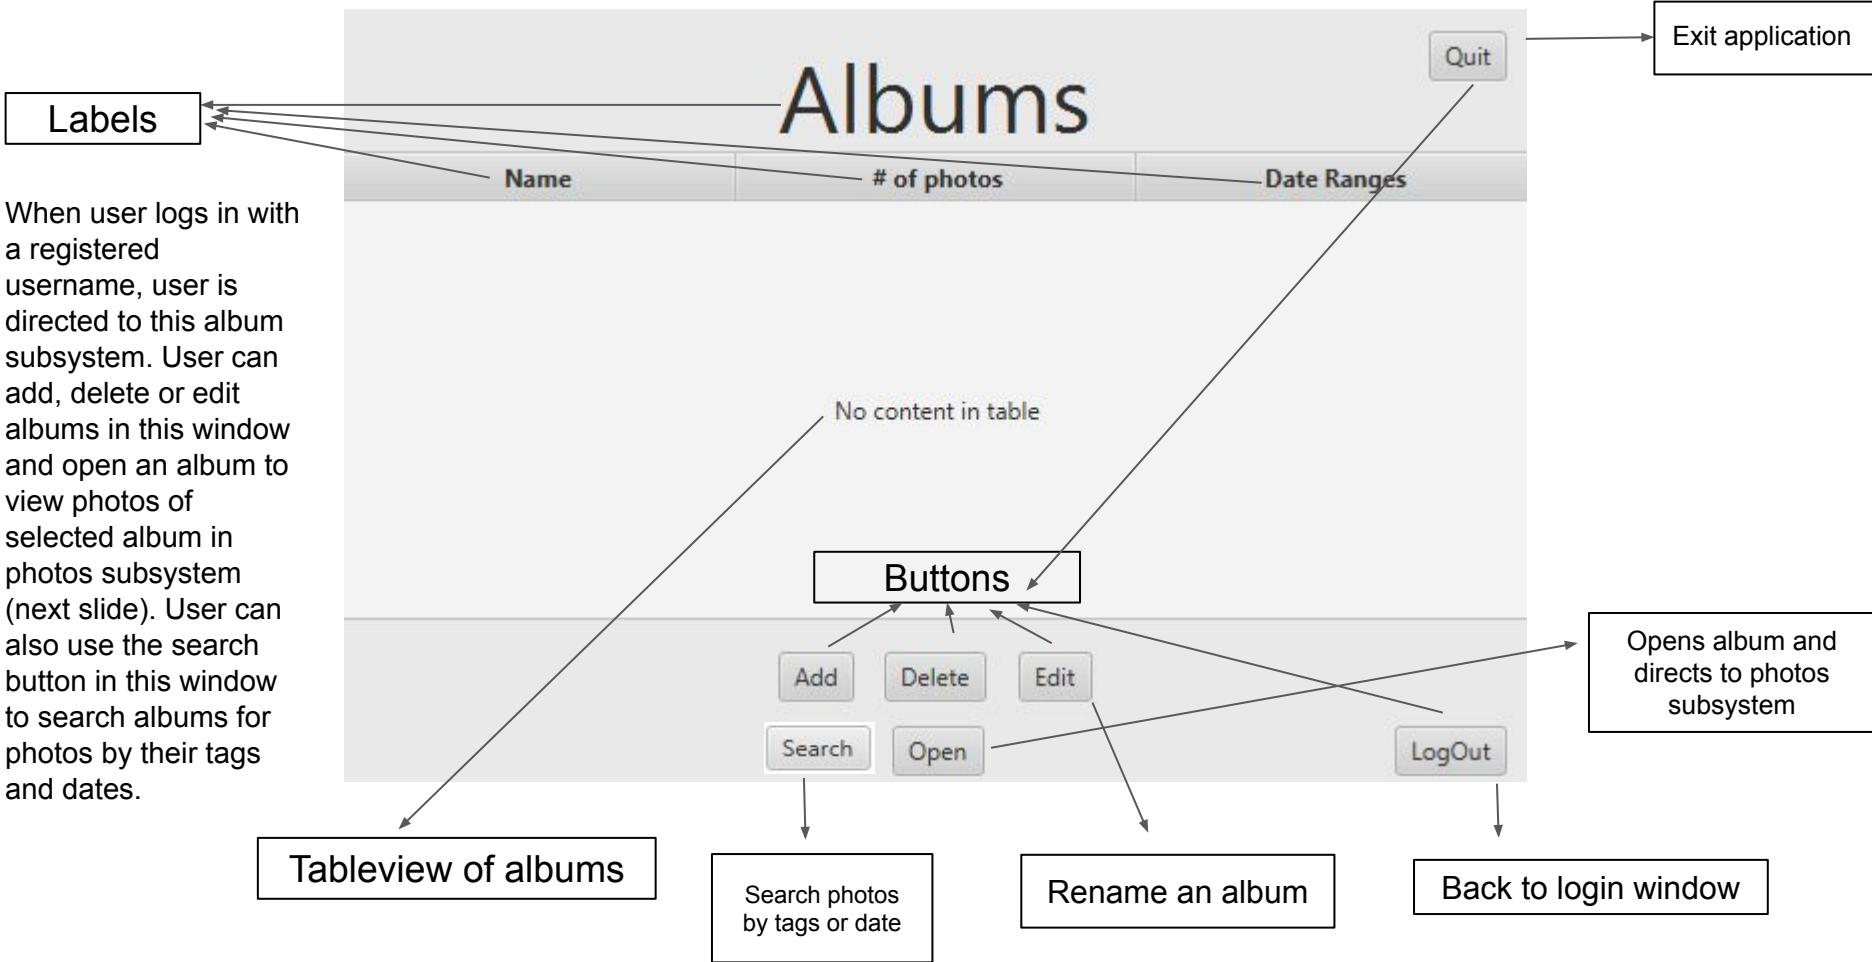

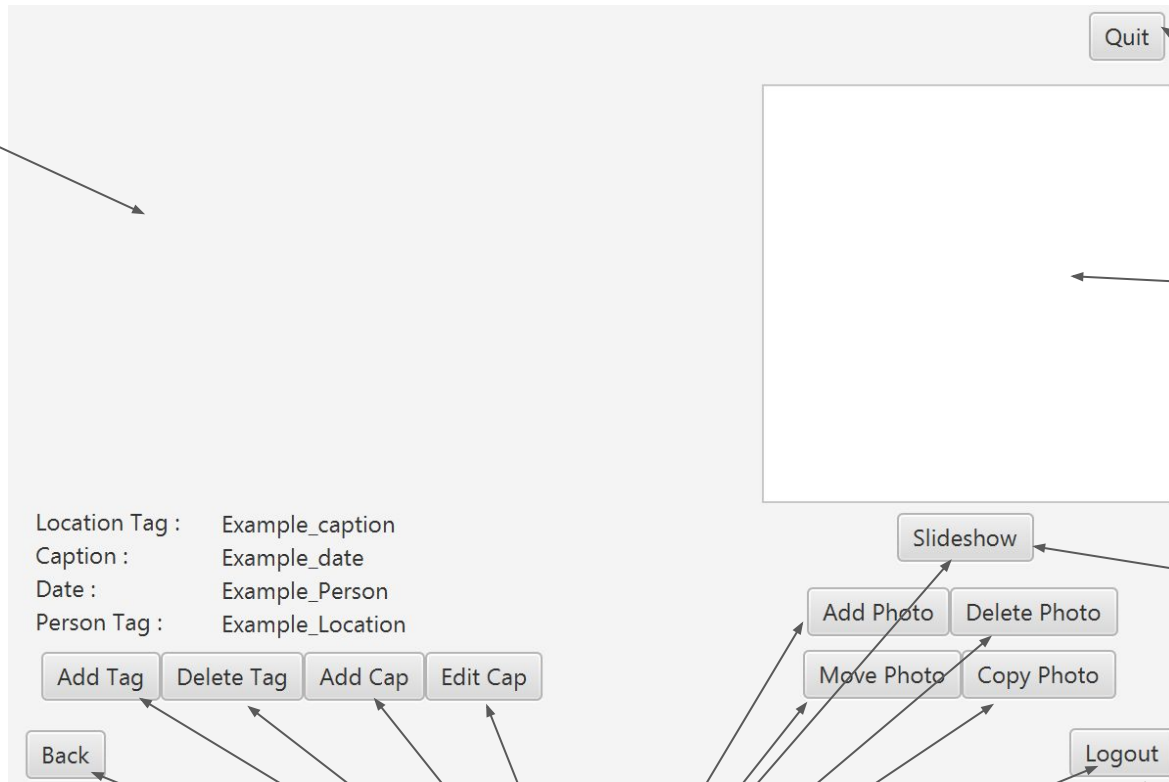

When the photos application is run, the user is prompted to a login window. User could either log in as admin to be directed to a admin subsystem or log in as a registered username to access album and photos of the user.

Logging in as admin directs user to admin subsystem, where all the admin functionalities are available. Admin can add or delete user from the listview with all users in the system listed within the listview.

Displays the Image
(Image View)

When the user opens the album, they will be redirected to this page. Here contains many different functionality like adding/remove tags, captions and pictures. The user is able to copy and move photos into a different album. In addition, the user is able to create a slideshow of the photos in the album
